

Competitive finished price contracts announced

New forward price contracts for all types of finished cattle have been announced by Blade Farming (SW) Ltd.

Following a prolonged period of uncertainty in the beef industry which has seen unprecedented rises in both inputs and outputs, there is now once again the opportunity for finishers to secure a forward price for their cattle. Producers can have the option of a two different types of contract;

- i) A contract linked to the weekly market price with a minimum price built in

or

- ii) A 'pain and gain' contract which tracks the weekly cattle prices

New contracts are available for young bulls, and all breeds of commercial steers and heifers. Contracts are also available for Aberdeen Angus cattle, and more details of this scheme are available elsewhere on the website.

Please call the Blade office to discuss your options in more detail and to arrange a visit from one of our fieldsmen.
